

Full Body Harnesses - "A" Series

Extra-thick woven seat webbing

Extra-Large Back Pad

Corrosion Resistant Grommets

Improved Geometry

Built-In Impact Load Indicators

Lanyard Keepers on Chest Strap

"A" Series Harness Features

Product Features & Specifications

Inspectable

- Tattletale™ webbing has an interior ply of contrasting bright red "strength" yarns that increase webbing strength to 7000 lbs (31kN) and instantly reveal cuts or abrasion
- Built-in impact load indicators
- Bar-coded individual serial numbers for traceability
- Indelible serial number in back plaque

Comfortable

- "Floating" thigh stitching reduces binding
- Improved geometry brings buckles to front of thigh
- Angled stitching for "tailored" sub-pelvic fit
- Extra large back pad eliminates dangerous 'D-ring droop'

Durable

- No elastic webbing
- Heat-set labels won't come off
- Corrosion resistant grommets
- Extra thick woven (not sewn) seat webbing for added durability

What is Tattletale™ Webbing?

Tattletale™ web is inspectable

web. All load-bearing straps in Reliance harnesses and lanyards have a red inner core (or a yellow core in black webbing) which becomes exposed when the web becomes damaged by cuts or abrasion. Red that shows through is not a "red light" signaling the user to stop using the equipment, it simply "tells" the user that the equipment needs closer inspection, and where to look. The webbing helps again by giving the Competent Person (the expert) the information needed to judge how deep the cuts or abrasions are, so the seriousness of the issue can be determined. Call Reliance at 888.362.2826 for complete inspection procedures.

Full Body Harnesses - "A" Series

* Please Note : Harnesses sized as follows : 8XX1XX = Small, 8XX4XX = X-Large, 8XX5XX = XXL, 8XX6XX = Big Boy

"A" Series Full Body Harnesses

Part #	Style	D-Rings	Connectors	Material	Other
800000	Vest	Back	Tongue Buckle	Polyester Web	Universal Fit

898003	Vest	N/A	Pass-Through	Polyester	Harness/Lanyard Combination
898004	Vest	N/A	Pass-Through	Polyester	Harness/Lanyard Combination

Harness Buckle Types

All Reliance 'A' Series and Ironman™ Series full body harnesses utilize one of two types of fasteners to secure the lower leg portion of the harness (all chest straps are secured using pass-thru buckles)

Tongue buckle and grommet fasteners are corrosion resistant to ensure smooth, consistent operation. Grommets are inserted through an opening in the web as opposed to a punched hole to maintain webbing integrity. Consistent spacing ensures a custom fit regardless of user size. Harness sizing adjustment is easy, especially when wearing gloves.

Pass-Thru buckles are zinc-coated and smooth for a precise fit. Placement of the web through the buckle provides for a higher degree of custom adjustment than grommet and tongue buckle fasteners, and use of Pass-Thru buckles reduce the overall weight of the harness. Pass-Thru buckles are standard chest strap fasteners on all Reliance harnesses.
