

Fall Protection Competent Inspector

Schedule: Inspection class held the ***third*** Tuesday of every month

Duration: ½ Day (3 hours) 10:00 AM -1:00 PM (lunch included)

This course builds upon a student's practical knowledge of fall protection through the discussions of in-house testing and literature review; UV and chemical exposure to synthetic strapping and is designed to increase personal skill level through a variety of hands-on inspection exercises. This 3-hour course deals with the process of developing an inspection program and applying that to practical equipment inspection. Participants completing the course will be given the tools needed to be able to conduct competent person inspections of fall protection equipment. However, this course does not provide the knowledge base required for re-certification of complex hardware such as SRLs and mechanical equipment. Students will be provided with an inspection manual with checklists and a certificate upon completion of the course.

Topics Discussed: The regulations and standards for inspection of fall arrest systems are covered in detail along with the record-keeping requirements. • Inspection premise for harnesses, lanyards & shock absorbers, carabiners, anchorage connectors, and SRLs • Skyline Horizontal lifelines • Equipment logs and recording the inspection • Practical equipment inspections of faulty gear • Review of technical bulletins

Participants will receive a wallet-sized certificate of completion and a copy of Reliance's "Fall Protection Equipment Inspector Manual."

- ✓ ***The Horizontal Lifeline Installer Course will be limited to 12 people to achieve maximum benefit to the participants.***
- ✓ ***The Fall Protection Competent Inspector Course will be limited to 20 participants. This is due to hands on lab portion***
- ✓ ***To accommodate large groups, Reliance may schedule special courses with the proper notice***

Reliance Horizontal Lifeline Installer Training

Schedule: Installer class held the ***third*** Wednesday of every month
Duration: ½ Day (4 hours) 9:00 AM -1:00 PM (lunch included)

This is an alternative to onsite training that may be difficult to achieve on your time-schedule. If you can spare a minimum of one half day of training at our Deer Park Facility; we will provide you with the necessary training and skills to take back to your facility. It is no-charge to users of the Skyline portable system and we will provide lunch:

- ✓ *Erect lifelines in different configurations, so that you can develop a team of Installers and supervise them in the proper techniques and skills. All team Members expect strict maintenance of quality assurance through a continuous Audit process. Installers may attend this portion of the class and continue to Improve their skills while we continue with designer skills development.*
- ✓ *Look at plant take-off designs required to develop a transitional fall protection plan with respect to Skyline HLL and other appropriate static anchorages tools. After learning how to utilize our on-line lifeline designer, you will learn how to develop a needs assessment for your project related to required equipment components to order.*
- ✓ *Briefly review rescue plans in the event of a fall.*
- ✓ *Brief test, review, and certification.*

- ✓ **Registration must be acknowledged with the Training Manager at (888) 362-2826 or via email at training@reliable.com with a check, or credit card**
- ✓ **Reliance withholds the right to cancel/reschedule any course due to lack of attendance or unforeseen circumstances.**
- ✓ **Reliance offers Competent Person Training once per quarter. Visit www.reliable.com for registration and scheduling.**
